EXPERIENCE

Frontend Developer Intern

July 2024 - December 2024

Qiscus - Remote

- Collaborated with a team to develop and enhance product features for Qiscus Superadmin, contributing to an improved user interface.
- Built an intent classification visual builder using Vue.js and Nuxt.js, supporting streamlined client operations.
- Assisted in documenting development processes, promoting consistent coding practices within the team.

Frontend Developer Intern

June 2024 - September 2024

Luarkelas - Remote

- Maintained and developed new features for the Luarkelas website using React.js, ensuring responsiveness and functionality.
- Contributed to the development of the Luarkelas Academy platform using Next.js, integrating core learning modules.
- Worked on cross-browser compatibility issues to improve website accessibility.

Android Development Mentor

August 2023 - January 2024

Bangkit Academy by Google, GoTo, Traveloka - Remote

- Provided mentorship to 25 participants, leading to a 90% course completion and certification rate.
- Conducted weekly consultation sessions covering reminders, shared best practices, and discussed Android development challenges.
- Achieved an average satisfaction rating of 4.69/5.00 from mentees through personalized feedback and support.

Android Developer

November 2022 - July 2023

PT Securetasks Global Teknologi - Remote

- Conducted research on Wazuh, exploring its applications for mobile development and security insights.
- Developed the "Team Hub" mobile app using Flutter and Dart, focusing on team collaboration features.
- Created a job application connecting users with cybersecurity professionals, employing a combination of Flutter and Android Native (Kotlin).

Android Development

February 2022 - July 2022

Bangkit Academy by Google, GoTo, Traveloka - Online

- Successfully completed a comprehensive, industry-aligned program that developed core competencies in Android Development achieving a final score of 89.48.
- Specialized in Android Development, mastering a robust curriculum that included Basic Kotlin, Android for Beginners, Fundamental Android, SOLID principles, and Intermediate-level Android techniques.
- Acquired hands-on experience in building scalable Android applications using Clean Architecture, MVVM, Retrofit, Room Database, and threading mechanisms such as Kotlin Flow and LiveData.
- Collaborated on the Capstone project Valo.Ai, a mobile solution offering personalized vaccine recommendations and location information, which integrated advanced mobile development methodologies and teamwork.
- Attained five certifications from the Dicoding Learning Platform and earned the Associate Android Developer Certificate from Google, demonstrating advanced Android development proficiency.
- Enhanced soft skills such as leadership, communication, and problem-solving, along with English proficiency, ensuring readiness for a seamless transition into professional tech environments.

Web Developer

August 2020 - January 2021

Neosantara - Tasikmalaya

- Developed front-end components and integrated them with the back end using Svelte.js, enhancing the overall web application structure.

- Designed and built a Mini Gold Distributor web application using Laravel.
- Initiated development on a scalable school platform as a front-end developer, focusing on user experience.
